

The **World** Plugs Into **India**

India today stands at the heart of the global electronics revolution. From smartphones and smart homes to connected mobility and intelligent living, the country is no longer just consuming technology — it is shaping its future. Now the world's third-largest electronics market, India is where manufacturing ambition, innovation, and massive demand come together at scale. CEI – Consumer Electronics & Home Appliances Expo channels this momentum into one focused B2B platform, purpose-built to connect international and Indian manufacturers with pan-India buyers, distributors, and trade partners, enabling market entry, expansion, and long-term business growth across India's vast and diverse consumer landscape.

Advantages of **CEI**

Enter the world's fastest-rising electronics and semiconductor market through CEI — the centrestage for next-gen tech including IoT, AI, connectivity, embedded systems, cloud and smart devices, all powered by India's massive surge in demand.

Drive meaningful business outcomes by connecting with decision-makers who matter — from high-volume buyers and sourcing heads to distributors, OEMs, trading houses and long-term strategic partners.

Showcase your capabilities to a future-focused audience, build strong distribution channels, attract strategic investments, and stay ahead with insights on emerging trends and technologies as India positions itself as a global electronics powerhouse.

India's **Growth** Story

India has officially surpassed Japan to become the world's 4th-largest economy and is projected to rise further, overtaking Germany to become the 3rd-largest economy by 2028 — a surge that mirrors the country's booming electronics sector, where demand for components and sub-assemblies is set to jump from US \$45.5 billion in 2023 to US \$240 billion by 2030.

According to IBEF, The Indian major home-appliances market (refrigerators, air-conditioners, washing machines etc.) is projected to grow at a CAGR of ~7.2% between 2024-2030.

Converge at an Industry Trade Show
Accentuate your Brand
Network with Industry Stakeholders
Connect with B2B Trade Buyers
Collaborate and Scale

Government & **Investment Momentum**

Collaboration Opportunities through Government Initiatives.

PLI schemes and electronics clusters are fast-tracking large-scale manufacturing in India.

India's electronics sector is expected to create 5–6 million jobs by 2030.

India is building a **complete end-to-end electronics manufacturing ecosystem**.

Global supply chains are shifting to India for design, manufacturing, and exports.

Exhibitors' Feedback

It was amazing. This platform has given us a lot of opportunities to meet with buyers who are genuinely interested in our technology. CEI is a wonderful platform, creating a win-win situation for everyone.

Lepu Medical Technologies

I liked the diversity and different industry categories here. I was able to meet with various manufacturers at this one location itself, so I am quite pleased with this show.

Pritesh Khilnani

Head – Global Logistics & Procurement CeX
WeBuy Ent. Pvt. Ltd.

This is our first time here. We have already taken orders from a few major customers. Not only that we now have a better understanding of the requirements of Indian customers and industry. This exhibition has given a fillip to our growth here.

BJD Group

The fair was very good for us. It helped us meet new manufacturers and suppliers and was an excellent show overall.
