Where Technology Finds Its Market

WORLDEX 

The **World** Plugs Into **India**

India today stands at the centre of the global electronics revolution. From smartphones to smart homes, from connected cars to connected lives — India isn't just consuming technology, it's creating the future of it. As the world's third-largest electronics market, India is the powerhouse where manufacturing, innovation, and demand converge. At CEI 2026 – Consumer Electronics & Home Appliances Expo, we bring together this unstoppable momentum into one dynamic platform — where ideas spark, collaborations form, and businesses grow. Import-export partnerships to technology tie-ups and distribution alliances. CEI bridges India's growing demand with the world's manufacturing excellence, creating a future-ready ecosystem where every handshake means opportunity.

India's Growth Story

Global Reach:

Connecting manufacturers from across Asia, Europe, and beyond with India's top distributors, chain stores, and e-tailers.

Innovation-Driven:

Featuring the latest in AI, IoT, Smart Living, AR/VR, and energy-efficient solutions.

Business-Centric:

Focused on creating tangible outcomes — trade, partnerships, and long-term business growth.

India's electronics production, valued at US \$101 billion in FY 2023, is projected to reach US \$300 billion by 2026 and further climb to US \$500 billion by 2030, driven by strong policy support, expanding manufacturing capacity, rising global demand, and a sustained annual growth rate of 20–22%.

India has officially surpassed Japan to become the world's 4th-largest economy and is projected to rise further, overtaking Germany to become the 3rd-largest economy by 2028 — a surge that mirrors the country's booming electronics sector, where demand for components and sub-assemblies is set to jump from US \$45.5 billion in 2023 to US \$240 billion by 2030.

According to Statista, The Indian major home-appliances market (refrigerators, air-conditioners, washing machines etc) is projected to grow at a CAGR of ~8.45% between 2025-2030.

India's electronics exports soared 41.9% to USD 22.2 billion in April–September 2025, led by a 58% jump in smartphone exports, cementing India's position as the world's 3rd-largest smartphone exporter.

Government & Investment Momentum

India's policy environment is tuned to large-scale manufacturing benefits like the **Production Linked Incentive (PLI) schemes targeted to support** for component manufacturing, and infrastructure push across electronics clusters.

India is now developing a complete electronics manufacturing ecosystem — covering components, modules, sub-assemblies, and materials — to make the country a globally competitive and self-reliant electronics hub.

India's expanding electronics and manufacturing ecosystem is **expected to create over 5–6 million new jobs by 2030**, reflecting the sector's growing role as a key driver of employment and economic growth.

Global players are shifting supply chains into India — meaning less of **“assembled in India”** and more **“designed, made, exported from India”**. This offers unique sourcing, outsourcing & collaboration opportunities.

India's Electronics & Home-Appliances Boom —

Why Now, Why India?

India's consumer electronics and home-appliances Industry is at a pivotal inflection point. With global supply chains recalibrating and domestic demand accelerating, India is transforming from a manufacturing destination into a manufacturing powerhouse.

Exhibitors' Feedback

It was amazing. This platform has given us a lot of opportunities to meet with buyers who are genuinely interested in our technology. CEI is a wonderful platform, creating a win-win situation for everyone.

Lepu Medical Technologies

This is our first time here. We have already taken orders from a few major customers. Not only that we now have a better understanding of the requirements of Indian customers and industry. This exhibition has given a fillip to our growth here.

BJD Group

Buyers' Feedback

I liked the diversity and different industry categories here. I was able to meet with various manufacturers at this one location itself, so I am quite pleased with this show.

Pritesh Khilnani

Head – Global Logistics & Procurement
CeX WeBuy Ent. Pvt. Ltd.

The fair was very good for us. It helped us meet new manufacturers and suppliers and was an excellent show overall.
